Now answer the following questions:

- 1) Who had the highest average for all three tests?
- 2) Who had the lowest average for all three tests?
- 3) Who had the highest test score?
- 4) Who had the lowest test score?

Unfortunately, there has been an error and Mike's test 3 result has been re-examined. It should be 75. Make all the necessary changes to the spreadsheet. What effect does this have on the average scores of all three tests?
